## Flight Details

The screenshot shows the SQLPro application window. At the top, there's a toolbar with various icons for file operations, editing, and viewing. Below the toolbar, a SQL query is entered in a text area: `select * from demo.flightdetails;`. The query is highlighted in blue. Below the query area, there's a section titled "Result Grid" which displays the results of the query in a table format. The table has columns: id, date, destination, flight, source, and ticketprice. The results show four rows of data, each with a unique flight ID, date, destination, source, and ticket price. The first row is highlighted in blue.

id	date	destination	flight	source	ticketprice
1	2022-01-09 00:00:00	UK	00001	INDIA	7000
2	2022-01-09 00:00:00	USA	00002	INDIA	9000
